Plant in Groups of the Same Variety

FOR BIGGER AND BETTER DAFFODILS . . .

Seven or nine bulbs, or even more, of the same variety planted in groups are more effective than bulbs planted in a straight line or row. The earlier Daffodils and Narcissi are planted, the better root system they develop, which results in bigger and better bloom. Bulb food applied at time of planting produces still better results. Plant bulbs 6 inches deep and about 6 inches apart.

If you do not find any particular variety of Daffodil you are in need of, on these pages, kindly let us know. If not in stock, we can procure and supply it at regular prices. Order early to be sure of the best.

Blooms in Late April—Rich in Fragrance

Hyacinth bulbs should be spaced 10 inches apart and planted 5 to 6 inches deep. Ideal for the formal garden, they also can be planted informally in groups in the perennial border or in the foreground of the shrub border. They will scent the spring garden as no other early-flowering plant can do.

Apricot Queen. Apricot-orange.

Carnegie. White.

City of Haarlem. Yellow.

Delft Blue. Medium blue.

King of the Blues. Dark rich blue.

La Victoire. Red.
